The online version of the BRLI provides a more convenient and efficient way to administer, score, and interpret the assessment. The online platform also includes a number of additional features, such as the ability to track student progress over time and generate reports. To access the online version of the BRLI, you will need to purchase a subscription from Pearson Education. Subscriptions can be purchased for individual users or for schools and districts.

## **Administering the BRLI**

The BRLI can be administered by a variety of professionals, including educators, clinicians, and researchers. The assessment typically takes between 60 and 90 minutes to complete. The assessment can be administered individually or in a group setting. The BRLI can be administered in a variety of settings, including schools, clinics, and research laboratories.

Before administering the BRLI, it is important to ensure that you have the necessary materials. These materials include the BRLI assessment booklet, a pencil, and a timer. You should also create a comfortable and quiet environment for the individual being assessed.

To administer the BRLI, follow these steps:

1. Introduce yourself to the individual being assessed and explain the purpose of the assessment.
2. Provide the individual with the BRLI assessment booklet and a pencil.
3. Set a timer for 60 minutes.

4. Instruct the individual to read the instructions on the assessment booklet.
5. Start the timer and allow the individual to begin the assessment.
6. Monitor the individual's progress and provide assistance as needed.
7. When the timer goes off, stop the assessment.
8. Collect the assessment booklet.

## **Scoring the BRLI**

The BRLI is scored by hand. The scoring process involves counting the number of correct and incorrect responses for each section of the assessment. The total number of correct and incorrect responses is then used to calculate a raw score for each section. The raw scores are then converted to scaled scores using a conversion table provided in the BRLI assessment booklet.

The BRLI provides a variety of scores, including a total score, a reading score, a language score, and a composite score. The total score is a measure of the individual's overall reading and language skills. The reading score is a measure of the individual's ability to read and understand written text. The language score is a measure of the individual's ability to understand and use spoken language. The composite score is a measure of the individual's overall reading and language abilities.

## **Interpreting the BRLI**

The BRLI provides a wealth of information that can be used to understand an individual's reading and language skills. The scores on the BRLI can be used to identify areas of strength and weakness. The BRLI can also be

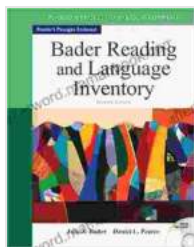

used to track progress over time. The information from the BRLI can be used to develop individualized instruction plans and interventions.

When interpreting the BRLI, it is important to consider the following factors:

- The individual's age and grade level
- The individual's cultural and linguistic background
- The individual's academic history
- The individual's current reading and language needs

By considering all of the factors, you can gain a better understanding of the individual's reading and language skills and develop appropriate interventions.

The Bader Reading Language Inventory is a comprehensive evaluation tool that provides a wealth of information about an individual's reading and language skills. The BRLI can be used by educators, clinicians, and researchers to identify areas of strength and weakness, track progress over time, and develop individualized instruction plans.
