George Booty, a renowned neuroscientist and trauma expert, has developed a groundbreaking technology called the Virtual Brain that offers a revolutionary approach to healing from trauma and PTSD.

How Does The Virtual Brain Work?

The Virtual Brain is a computer-based program that uses advanced algorithms to create a three-dimensional model of your brain. This model is

based on functional magnetic resonance imaging (fMRI) scans, which measure the activity of your brain as you perform specific tasks.

Once your Virtual Brain is created, Dr. Booty can use it to identify the areas of your brain that are affected by trauma. He can then use targeted exercises to rewire these areas and restore healthy brain function.

The Benefits Of Using The Virtual Brain

The Virtual Brain has been shown to be effective in treating a wide range of trauma-related symptoms, including:

- Anxiety
- Depression
- Insomnia
- Flashbacks
- Nightmares
- Avoidance behaviors

In addition to reducing symptoms, the Virtual Brain can also help you to:

- Understand the neurobiology of trauma
- Develop coping mechanisms
- Build resilience
- Create a more fulfilling life

How To Use The Virtual Brain

The Virtual Brain is a safe and non-invasive treatment that can be done in the comfort of your own home. To get started, you will need to schedule a consultation with Dr. Booty.

During your consultation, Dr. Booty will assess your symptoms and determine if the Virtual Brain is right for you. If it is, he will create your personalized Virtual Brain model and develop a treatment plan.

Treatment typically involves a series of weekly sessions, each of which lasts about an hour. During each session, you will work with Dr. Booty to complete targeted exercises that are designed to rewire your brain and reduce your symptoms.

The Cost Of The Virtual Brain

The cost of the Virtual Brain varies depending on the severity of your symptoms and the length of treatment. However, it is generally comparable to the cost of traditional therapy.

Is The Virtual Brain Right For You?

If you are struggling with the effects of trauma or PTSD, the Virtual Brain may be a good option for you. It is a safe, effective, and non-invasive treatment that can help you to heal from the past and create a more fulfilling life.

To learn more about the Virtual Brain, please visit Dr. Booty's website or call his office at 1-800-706-8024.

Testimonials

"The Virtual Brain has changed my life. I was struggling with severe anxiety and depression after a traumatic event. I had tried traditional therapy, but nothing seemed to help. Then I found Dr. Booty and the Virtual Brain. After just a few sessions, I started to feel better. I am now able to manage my symptoms and live a normal life. I am so grateful to Dr. Booty for his help." -

Jennifer

"I was skeptical at first, but the Virtual Brain has been a miracle for me. I have been struggling with PTSD for years, and nothing has helped. I have been in therapy, I have taken medication, but nothing has worked. The Virtual Brain is the only thing that has made a difference. I am now able to sleep, I am able to go out in public, and I am able to enjoy life again. I am so grateful to Dr. Booty." - **John**
